Im
Auftrag
von

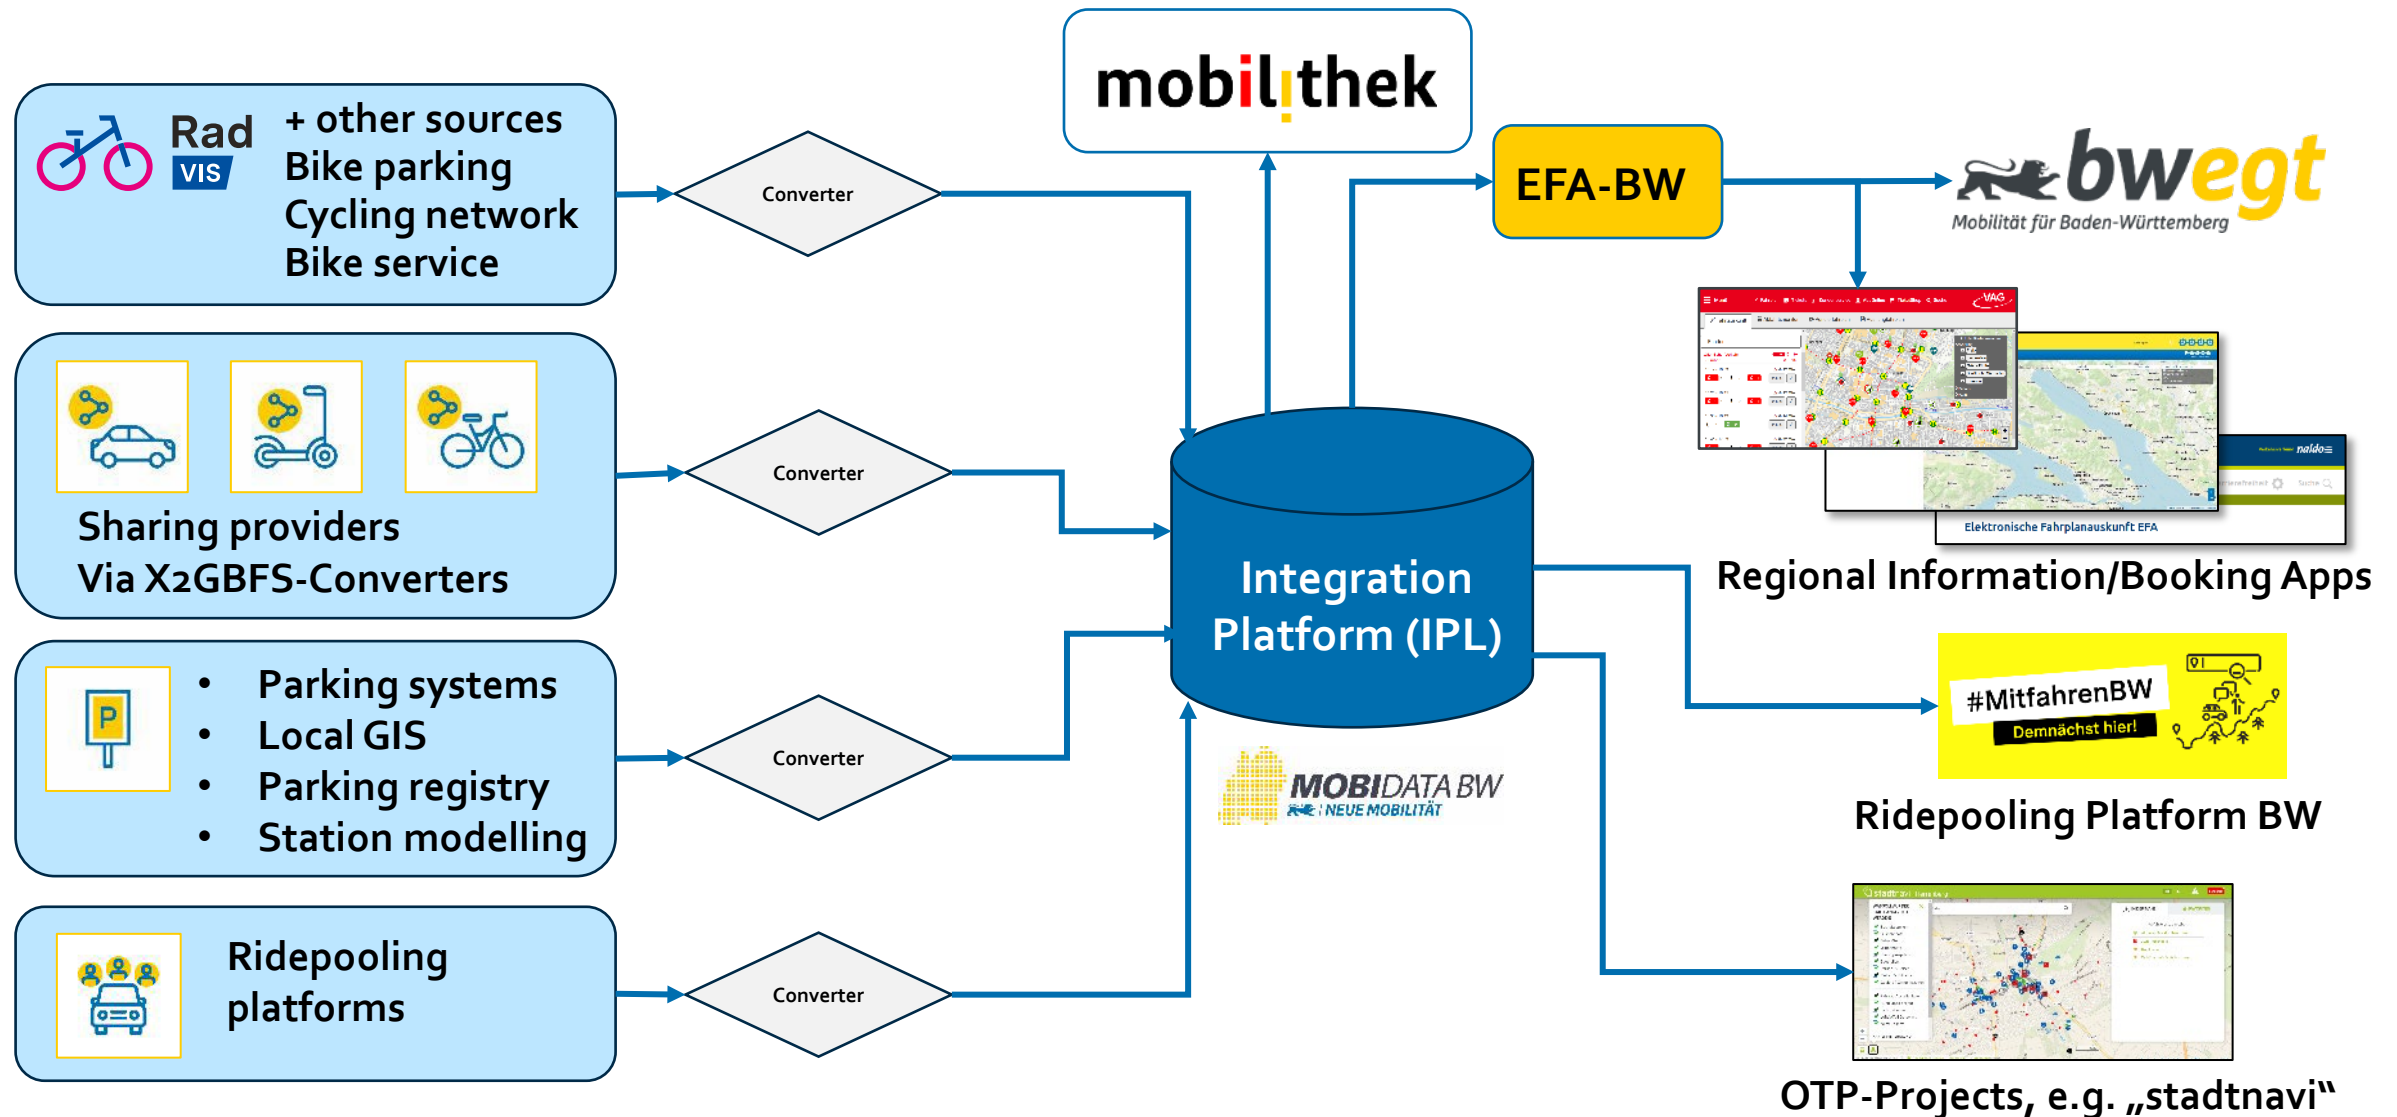

Baden-Württemberg
Ministerium für Verkehr

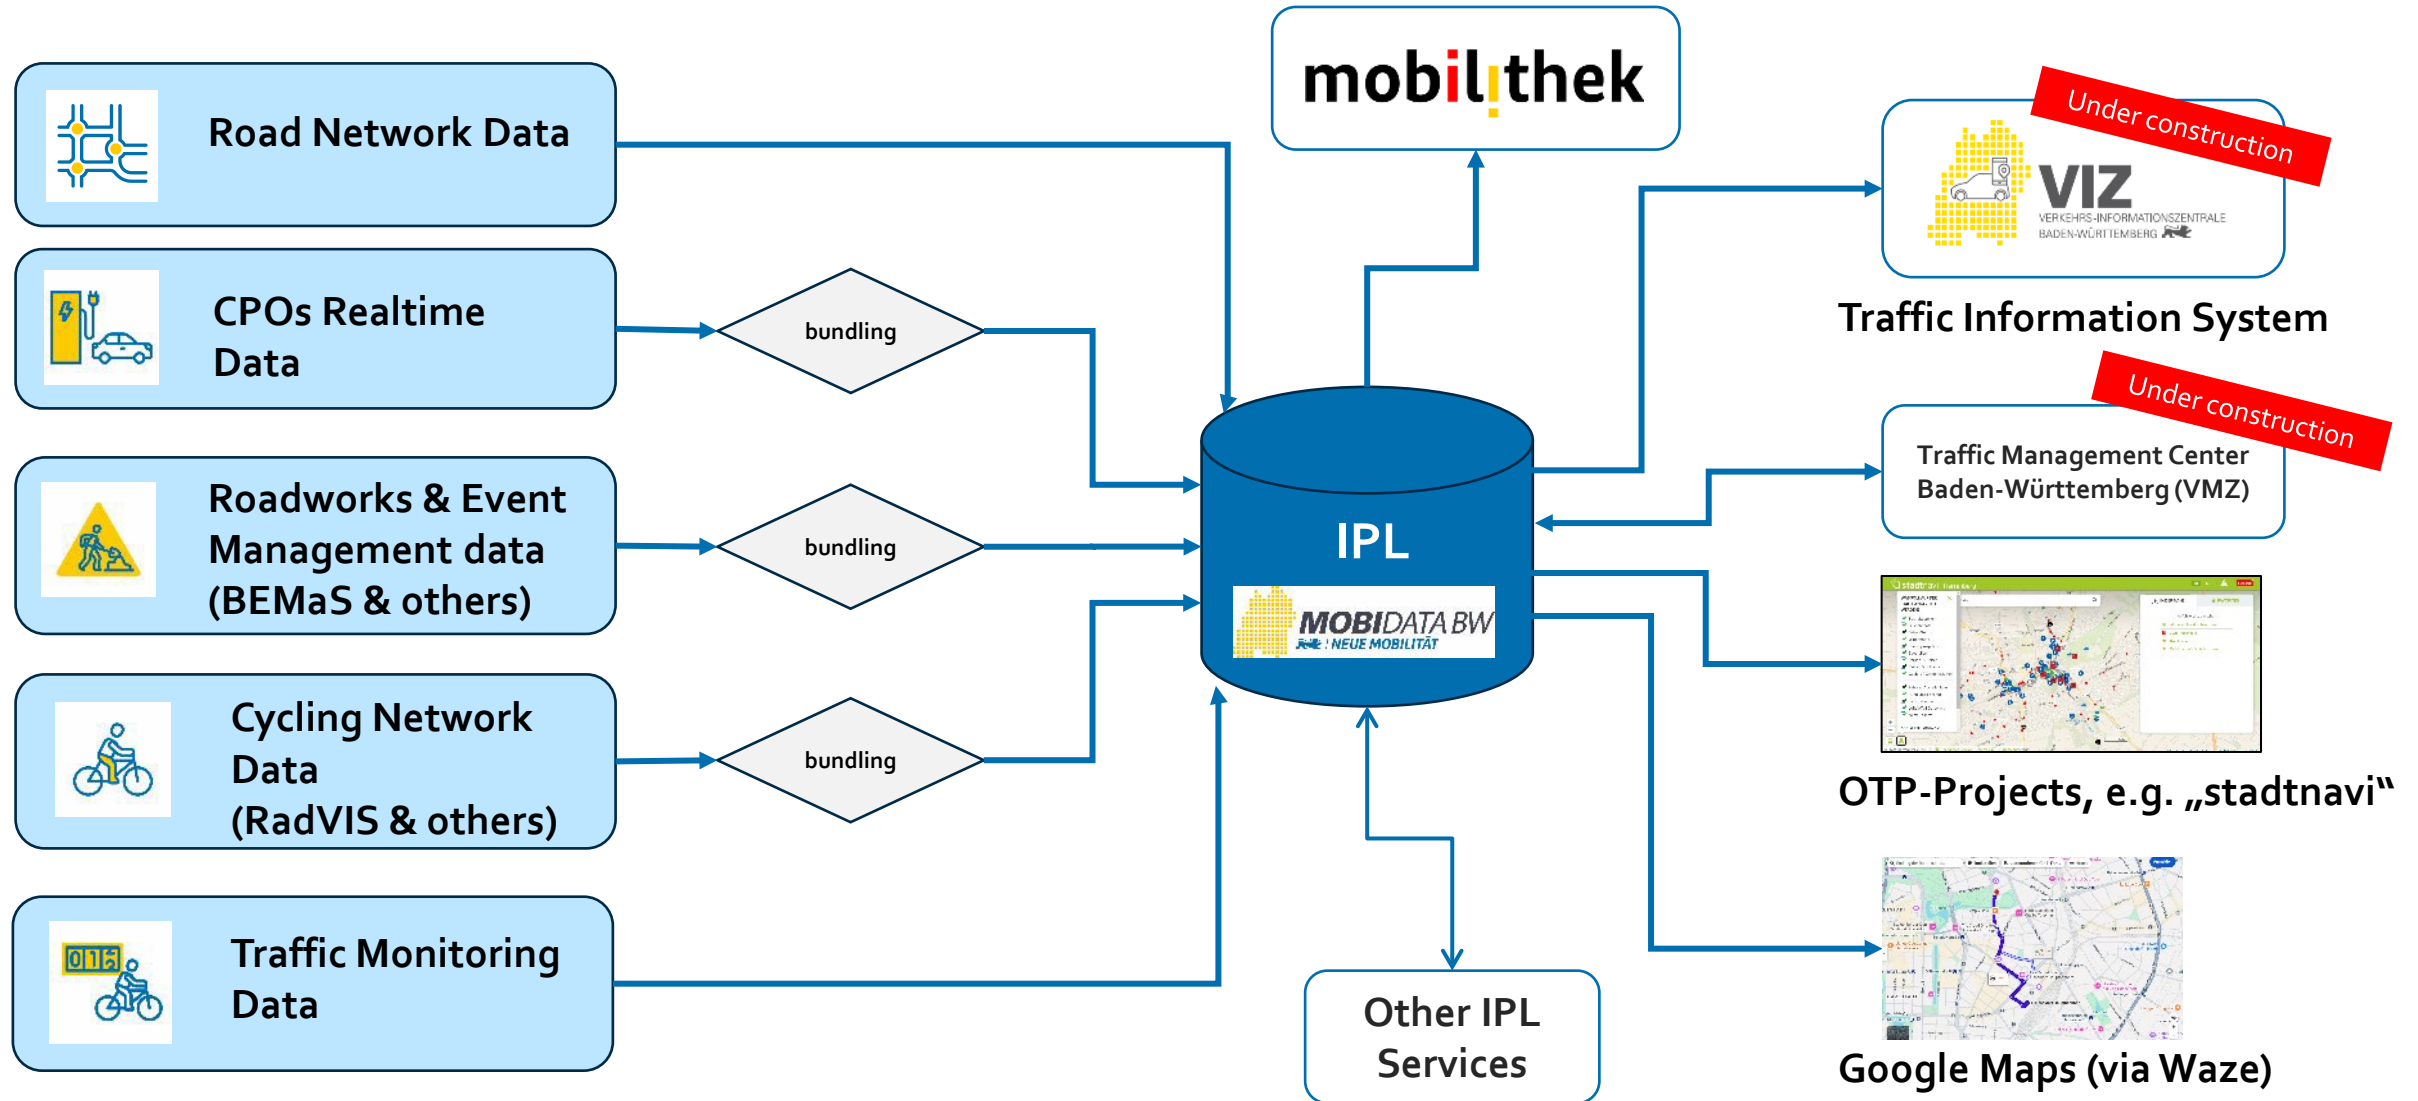

Mobility Network of BW

Focus on MMTIS-Data Categories & Use (excl. PT)

Focus on Road & AFIR Categories & Use

Open Platform Strategy

Open Data

Nearly all of the data is available as open data and can be accessed without registration.

Open Standards

We use and convert between open standards such as GTFS, OCPI, GBFS, and DATEX2. Proprietary standards are converted into open standards.

Open Source

All components are open source and can therefore be reused
